

## Online Real-time Touch Screen Biometric Kiosk (AMS Kiosk) 3.x

1. Uses **Microsoft's Online Real-time Websocket** Technology
2. Best for **nationwide/worldwide** scale biometric attendance monitoring
3. Can handle up to **one(1) million** of employees per kiosk
4. Supports per **branch** or **cluster** biometric attendance monitoring
5. **Real-time update** for each kiosk when new biometric template is enrolled
6. **Real-time update** for each kiosk when a biometric template is deleted
7. Uses **real-time server date** and **time**, local kiosk date and time is never used
8. Designed for 2-in-1 biometric/smartcard wall-mounted touch screen kiosk
9. Uses fast fingerprint **indentification** (instead of verification) technology
10. Supports up to eight (8) **consolidated fingerprints per template**
11. Can enroll one or more fingerprints per employee
12. Displays picture and last eight (8) IN/OUT logs of employee
13. Control for allowed interval in minutes between previous IN and current OUT
14. Control for allowed interval in minutes between previous OUT and current IN
15. Two modes:
  1. Automatic (System automatically detects IN or OUT)
  2. Manual (Employees selects IN or OUT before logging)
16. Runtime support for Microsoft .NET framework 4.5 or later
